STONE & TILE

Employee-owned and customer-driven, Morningstar Stone and Tile has set the bar for precise measuring, fabrication, and installation of stone and tile in Southern and Midcoast Maine for over 35 years. Our streamlined process has made us the worry-free choice for the region's contractors, interior designers, and homebuilders, who rely on us for everything from stone and tile selection to putting the finishing touches on an installation. We excel in solving complex structural challenges and paying attention to details, which results in the best possible finished product for renovation projects or new home construction.

Curated Stone Selection

No two stones are the same, making stone a visually interesting material for new construction and remodeling. Our inventory of high-quality, sustainable, and natural stone runs the gamut from traditional design to contemporary. Options range from classics like granite, marble, and quartz to quartzite/dolomite and soapstone.

Tiled to Perfection

Add pattern, texture, and color to your home with our unique selection of tile from international and national manufacturers as well as artisanal tile from America's finest small-batch artists. Our reputation for meticulous installation means your newly tiled wall, floor, backsplash, or artistic accent is guaranteed to increase the beauty of your home.

Custom Installation

Our expertise and experience ensure beautiful, made-to-order, high-quality workmanship on every installation. We spot issues early in the process to avoid larger problems down the road. With our custom installation process, every piece is shaped to the exact contours of your space, resulting in a perfect fit every time.

“ For over 35 years, our streamlined process has made us the worry-free choice for the region’s contractors, interior designers, and homebuilders, who rely on us for everything from stone and tile selection to putting the finishing touches on an installation. ”
